PROJECTS

Portfolio Website
- This portfolio website showcases my skills including technical and communication skills. It has been built using HTML5, CSS3 and little bit of Javascript. To make it responsive I have used media queries for particular break points. This website has also been deployed to netlify
- Website link-https://nilesh-mehtre.netlify.app/
- Github repo- https://github.com/Nilesh-Mehtre/portfolio-new

Paytm-clone
- This is paytm clone developed using HTML5 and CSS3. Flex and grid model is used to make web application responsive and user friendly. Attention to detail has been given to make user interface(UI) look like original paytm website. This website has also been deployed to netlify
- website link -https://paytm-app-clone.netlify.app/
- Github repo -https://github.com/Nilesh-Mehtre/Paytm-clone

Dental website
- This Dental website prototype can be used by any dental clinic. It has been build using HTML5, CSS3. To make it responsive I have used media queries for particular break points. This website has also been deployed to netlify
- website link - https://dental-website-project.netlify.app
- Github repo -https://github.com/Nilesh-Mehtre/DentalWebiste

Edutech website
- This is educational prototype which can be used by any coaching center or school. I have divided this website into services,blogs,contact and home page. frontend technologies like HTML5, CSS3, JavaScript and responsive web design have been used to improve user experience. This website has also been deployed to netlify
